TERU : Chief, Economic Research Area

Chief, Industrial Division, ORR

Rungarian Light Industry

- 1. Project 38.910 is an outgrowth in the work completed by the I/CI Branch in connection with the Hungarian NIS. However, the attached project considerably amplifies the original NIS contribution.
- 2. The present paper has gone through at least three drafts and brings together all of the relevant information presently available on the light industries of Hungary. I would urge publication as a FR. There is no need to give publication other than standard priority.
